Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This Office action is in response to the paper filed January 14, 2008 and the IDS received November 15, 2007.

1. The rejection under 35 U.S.C. 103(a) as being unpatentable over UETANI et al (6,627,381) in view of YAMAMOTO et al (7,005,230) and NAKANISHI et al (2002/0164540) is **withdrawn** in view of certified English translation of the priority document which perfects priority to the claims and predates the filing date to YAMAMOTO et al and thus making the rejection moot.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 1, 6-22 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-11 of copending Application No. 10/540,056 soon to issue as a U.S. Patent. Although the conflicting claims are not identical, they are not patentably distinct from each other because the positive resist composition of current application is fully encompassed by claims 1-11 of the copending application 10/540,056. The

resin (A) of 10/540,056 is composed of a hydroxystyrene, styrene (claim 6) and (meth)acrylate ester containing an alcohol hydroxyl group, in which 10 mol% or more and 25 mol% or less of a combined total hydroxyl group are protected with an acid dissociable dissolution inhibiting group made from a tertiary alkyl group. The comprising language of the claims in 10/540,056 includes other components such as polypropylene glycol and thus fully encompasses the claims of 10/865,040. A patent to both cases 10/865,040 and 10/540,056 would extent the grant beyond the 20-year limit for a single invention.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
